TEMPO

Technologies and hardware for neuromorphic computing

Deliverable

D7.3 – Final Dissemination Fact Sheet

Work Package:	WP7 (Dissemination and Exploitation)
Dissemination level:	Confidential
Official due date:	31.01.2023
Document editor:	Yannick Le Tiec (CEA)
Contributing partners:	IMEC, CEA, FhG, IMEC-NL, STC, TASF, PRE, STG, ATOGEAR, TUD, BOSCH, IFAG, INNOSENT, UZH, VIC, SynSense, PMS, VID
Internal reviewers:	Holger Schmidt (IFAG), Björn Debaille (IMEC)
Document version:	V1.0

1. Publishable summary

This document gives an overview of the types of dissemination, communication, and outreach activities planned and undertaken during the project lifetime, to raise awareness about the project and ensure the uptake of project results. This deliverable concludes the project activities in T7.1 (Dissemination) and builds the planned and intermediate dissemination reports D7.1 and D7.2, as well as the report on the press releases (D7.7) and the initial website launch (D7.8) developed in T7.3 (Communication activities). This document forms a whole with D7.6 (Final Exploitation Fact Sheet) which details the project's plans for exploitation and for how to introduce the project results in the market.

This deliverable "D7.3 - Final Dissemination Fact Sheet" describes the active presentation of the new knowledge and results obtained in the TEMPO project to make the progress of material development easily available to project partners, engineers, technologists, customers, PhD students and other interested communities including the broad public. For an effective dissemination strategy, the appropriate means and tools of dissemination have been selected, based on the character of targeted audiences.

The TEMPO consortium drove a worldwide dissemination effort to ensure the largest possible visibility and impact of the project findings and to support the widest adoption of its results in the broad microelectronics ecosystem.
